Quality policy

Kobol Refrigeration S.L. U.

Welcome to **KOBOL REFRIGERATION S.L. Or.** We want you to know us and know the politics that guide our present and future.

Our **experience in the design, production and commercialization of condensers, evaporators, and heat exchangers**, covers half a century of existence, with a clear **international vocation** and with products that provide services in more than seventy countries.

Our **extensive catalog** can be seen at: www.kobol.es.

It differentiates us from the rest in **prioritizing** the needs of our customers, offering them services and the **customization** they require at all times, always accompanied by a **price** and **tight deadline** and with the quality that distinguishes our product.

KOBOL REFRIGERATION S.L. U. *is committed to meeting customer, legal, regulatory and other requirements, as well as continuous improvement of the quality, environment and health and safety at work management system. Proof of this commitment is the performance of annual audits by an external certification body.*

Our brand **KOBOL**, demonstrates its **reliability, efficiency and operation** in the field day by day, for many years, thereby endorsing its quality.

KOBOL REFRIGERATION S.L. U. It has a permanent vocation for **research, development and innovation** and for this and to make products adapted to the needs of our customers, it considers investment key and managing business processes in an innovative way according to the new industrial model 4.0

Our **policy, future and sustainability** are understood to be linked to the stakeholders of **KOBOL REFRIGERATION S.L. U.** To all our travel companions in this project: **shareholders, customers, suppliers, workers, distributors, installers, media and institutions.**

Together respecting **the environment, safety and health at work**, transparency, equality in treatment, in harmony with the community we achieve that our policy is not only words but deeds, a fundamental part of this exciting project.

Company managements establishes:

- It is committed to environmental protection, including the prevention of pollution
- Is committed to providing safe and healthy working conditions for the prevention of work-related injuries and health impairment including a commitment to eliminate hazards and reduce risks to occupational safety and health.
