Kobol Refrigeration S.L.U.

Welcome to KOBOL REFRIGERATION S.L.U. we want you to get to know us and the policy that guides our present and future.

Our experience in the design, production and marketing of condensers, evaporators and heat exchangers covers half a century of existence, with a clear international vocation and with products that provide services in more than seventy countries.

Our extensive catalogue can be seen at: www.kobol.es.

We differentiate ourselves from the rest in prioritizing the needs of our customers, offering them services and the personalization that they require at all times, always accompanied by a tight price and deadline and with the quality that distinguishes our product.

KOBOL REFRIGERATION S.L.U. is committed to complying with customer, legal, regulatory and other requirements, as well as to the continuous improvement of the management system for the improvement of quality, environmental and occupational health and safety performance. Proof of this commitment is the performance of annual audits by an external certifying body.

Our KOBOL brand demonstrates its reliability, efficiency and operation in the field day by day, for many years, there's guaranteeing its quality. in accordance with the new industrial model 4.0 key

We understand our policy, future and sustainability to be linked to the stakeholders of KOBOL REFRIGERATION S.L.U. and all our fellow travellers in this project: shareholders, customers, suppliers, workers, distributors, installers, media and institutions.

Together, respecting the environment, occupational safety and health, transparency, equal treatment, in harmony with the community, with the commitment to consultation and participation of workers, and when they exist, of workers' representatives, we achieve that our policy is not just words but deeds, a fundamental part of this exciting project.

The Directorate establishes:

- commitment to environmental protection, including pollution prevention, and
- commitment to provide safe and healthy working conditions for the prevention of work-related injuries and deterioration of health, including commitment to eliminate hazards and reduce risks to occupational safety and health
